USES AND APPLICATION
Siltech®E-3132 is used as a release agent for metal die casting, rubber, concrete, plastic parts, without affecting the subsequent post finishing process.

Key features of Siltech®E-3132 include:
- Excellent release
- Higher heat resistant vs organic mold release agents or di-methyl siloxane release agents
- No interference with post finishing e.g. painting, coating or bonding
- Good emulsion stability
- Water dilutable

Prior to use, Siltech®E-3132 is diluted with water to a concentration of 0.5 - 1.5% solids. To ensure optimum results, the surface of the part or mold should be free of impurities, oils or greases. Siltech®E-3132 is typically applied by wiping, brushing or spraying.

SAFETY
Before handling, read the Material Safety Data Sheet and container label for safe use, physical and health hazard information.

STORAGE AND SHELF LIFE
When stored in the original, unopened containers between 10 and 40°C, Siltech®E-3132 has a shelf life of 12 months from date of manufacture.

PACKAGING
Siltech®E-3132 is available in 20Kg and 200Kg containers.

LEGAL DISCLAIMER
Siltech Corporation believes that the information in this technical data sheet is an accurate description of the typical uses of the product. Siltech Corporation, however, disclaims any liability for incidental or consequential damages, which may result from the use of the product that are beyond its control. Therefore, it is the user’s responsibility to thoroughly test the product in their particular application to determine its performance, efficacy and safety.
