DESCRIPTION
Silstab® 2993 is a non-hydrolyzable block copolymer of dimethylsiloxane and a polyoxalkylene, to be used in the manufacture of polyisocyanurate (PIR) boardstock foams blown with hydrocarbons.

USES & APPLICATIONS
Silstab 2993 imparts improved emulsification and nucleation producing a finer cell structure and lower k-factor.

Silstab 2993 is recommended for use with polyethylene terephthalate (PET), phthalic anhydride (PA) and dimethyl terephthalate (DMT) based aromatic polyester polyol systems for making board stock and bunstock.

During machine trials Silstab 2993 shows:
1. Improved flow
2. Smooth top surface, minimal scalloping
3. Increased “green” compressive strength.
4. Wide processing latitude, able to produce board thickness from <0.5 inch to 4 inches

The recommended concentration used is between 1.0 - 3.0% weight percent on the B-side.

SAFETY
Before handling, read the Material Safety Data Sheet and container label for safe use, physical and health hazard information.

STORAGE AND SHELF LIFE
When stored between 10 and 40°C in the original unopened container, Silstab 2993 has a shelf life of 36 months from the date of manufacture.

PACKAGING
Silstab 2993 is supplied in 200kg drums and 1,000kg totes.

LEGAL DISCLAIMER
Siltech Corporation believes that the information in this technical data sheet is an accurate description of the typical uses of the product. Siltech Corporation, however, disclaims any liability for incidental or consequential damages, which may result from the use of the product that are beyond its control. Therefore, it is the user's responsibility to thoroughly test the product in their particular application to determine its performance, efficacy and safety.
